

Quality Assurance Division Vacancies

The attached table shows the current status of all QAD vacant positions. These vacant positions are all in full recruitment. The vacancies are either currently advertised or have closed and the applications are being screened.

Four of these open positions are necessary for the Medicaid recovery efforts through the Program Compliance Bureau's TPL, SURS and PERM/Investigations Programs. Repurposing the positions would negatively impact the Division's ability to continue the Medicaid, SNAP, TANF recovery efforts.

The tasks performed by these vacant positions would have to be redistributed over fewer staff resources. The case loads for existing staff would not diminish and the federal mandated requirement for audit and recovery would not be changed or mitigated.

Four of the vacant positions are open until filled to meet the federal Medicare/Medicaid survey compliance mandate of performing on-site facility reviews under the state contract with CMS. These are the positions that travel the state extensively and present recruitment and retention challenges.
